A parcel changes hands three times. Nobody signs.

Two buses, three pairs of hands, no receipt at any stand.

Every driver quotes his own rate.

Pay is cash, days late, written down nowhere.

A torn parcel belongs to no one, so the shop pays.

Three taps at the stand. Paid at the handover.

1

Tap

Sticker, badge, lid photo. The phone's own key signs it.

`Android Keystore`

2

Check

A sealed AI reads the code on the lid and the parcel's state.

`0G compute, TEE`

3

Record

Every handoff on a public log, the photo encrypted.

`Hedera HCS, Arkiv, Swarm`

4

Pay

Half the stretch at once. The rest releases itself on delivery.

`Hedera HTS, scheduled tx`

Hedera · 0G · [ARKIV] · swarm

Nobody on the route sees a wallet or a token.

Daak

Daak earns on every parcel the buses already carry.

One real parcel, KNP-1204, 359 km

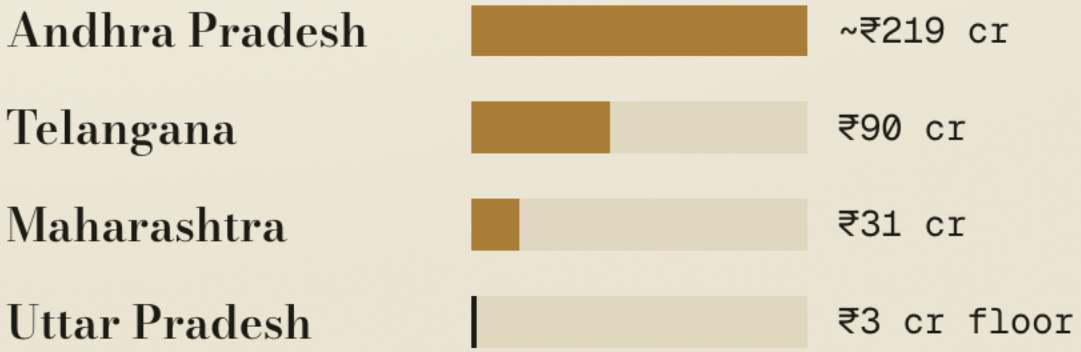

₹184.50 to the two drivers, by the km

₹22.14 booking fee to Daak, plus 2% of each payout

First market: daily B2B on one UP corridor (dairy, flowers, bakery)

Reach: bus booking offices, then courier franchises

What state buses earn from parcels, a year

APSRTC ₹60 lakh a day (The Hans India, Dec 2024), TSRTC 2022 (Telangana Today), MSRTC goods 2022-23 (RTI), UPSRTC tender reserve price (2022). UP: 12,000+ buses.

One UP corridor. Thirty days.

A pilot from Kanpur to Lucknow to Gorakhpur with five daily senders.

An introduction to the agent that holds UPSRTC's parcel rights.

A UPI payout partner, so drivers are paid to the bank directly.

Mainnet credits on Hedera and 0G to run the corridor in public.

Porter, for the buses that already run.
